

CONFIDENTIAL: SEIS Investment Opportunity

Turn the September MTD Crisis into a £72,000/Year Unfair Advantage.

THE BLEEDING IS REAL

This September, HMRC is auto-registering 300,000 sole traders for Making Tax Digital (MTD) for ITSA.

For Manchester's leading accounting firms, this isn't just a regulatory shift; it's a margin killer. In a few short months, your firm will be flooded by tradespeople, freelancers, and contractors who have absolutely no idea how to do digital bookkeeping.

They don't want to learn new software. They will inevitably hand over digital 'shoeboxes' of disorganised paperwork, crumpled receipts, and scribbled invoices. You cannot hire enough juniors to manually digitise this workload, and absorbing the cost will obliterate the margins on your sole trader portfolio.

THE SOLUTION: MEET 'EMMA'

We built the antidote. Emma is a headless WhatsApp AI bookkeeper.

No portals. No apps to download. No passwords to reset. No training required.

Your clients already use WhatsApp every single day. With Emma, they simply snap a photo of a receipt or forward a PDF invoice to a dedicated WhatsApp number. Emma's proprietary AI reads the image, extracts the line items, categorises the expense, and pushes perfectly formatted, clean JSON directly into Xero.

It is frictionless for the tradesperson and flawless for your practice.

THE OFFER

We are raising a closed, highly strategic SEIS round to fuel our UK rollout, exclusively partnering with forward-thinking firm Managing Partners.

* Ticket Size: £50,000

* Valuation Cap: £1,000,000

* Tax Relief: Fully SEIS eligible (50% upfront income tax relief, plus CGT exemption).

THE KICKER: A 5-MONTH PAYBACK PERIOD

We aren't just offering equity in a high-growth FinTech; we are offering an immediate, transformative operational upgrade for your firm.

Every £50k investor receives 500 free, fully white-labelled client seats for 3 years.

* The Saving: This eliminates £72,000 per year in equivalent software and manual processing costs.

* The ROI: Your £50k investment pays for itself in exactly 5 months through operational savings alone.

You solve your MTD crisis, protect your firm's margins, and get a £1M-cap equity stake in a scalable AI FinTech—effectively for free, once the software savings materialise.
