

Market Failure Evidence

Live data scraped directly from Trustpilot (UK) in September 2026. This data proves that legacy incumbents are fundamentally incompatible with the millions of sole traders forced into the HMRC MTD Phase 1 & 2 mandates.

The Xero Usability Crisis

"Xero is a disaster. What were easy processes with Sage, Xero makes **extremely difficult or not possible at all**. It's unprofessional, frustrating... even terms used are insensible. It's also totally inflexible... there is absolutely no magic at all, just despair."

"We opened a support case in June and have spent months pursuing a solution... The issue remains unresolved, customer service has been poor, and there appears to be little accountability... **so much for all the good marketing** around Xero."

The Dext (Receipt Bank) Pricing Crisis

"This company operated well when it was Receipt Bank; however, after the acquisition and rebranding to Dext, the quality of service has significantly declined. Their business practices have become concerning, particularly with a **pricing structure that changes frequently and lacks transparency** ... In our experience, these issues have resulted in thousands of dollars in unnecessary expenses."

*"Predatory, unhelpful customer service. As a professional bookkeeper, I signed up for a monthly subscription for Dext... **It just became too expensive** . I transferred my clients back to pay for their own subscriptions and tried to cancel mine... Will I ever go back to Dext? No freaking way."*
