Subject: Disrupting UK MTD (Pre-Seed allocation for an exceptional founder)

Hi [Angel's Name],

I'm reaching out because a brilliant technical founder in my network, Anas, is currently closing a £35k-£50k Angel Anchor tranche for an AI tax platform called **Invisible Accountant**, and it fits your investment thesis.

With HMRC's digital tax mandate (MTD) now live, and the final Phase 2 wave hitting 3.2 million sole traders in April 2027, the incumbents (Xero/Dext) are heavily over-serving and over-charging the market. Anas has built an autonomous, HMRC-compliant AI engine that lives entirely inside WhatsApp—allowing plumbers and freelancers to snap receipts and file taxes with zero app downloads, while preserving £1000s in tax relief.

He has completely retired the technical risk (the AI, HMRC API integration, and AES-GCM security are fully built). He is using this £50k SEIS-eligible micro-tranche specifically to finalize his UK Innovator Founder Visa and incorporate the UK entity, before opening the larger £350k institutional round.

I've attached the Anchor Deck. The unit economics (£12/mo D2C, £49+£9/mo B2B) and tech moat are incredibly impressive. Let me know if you'd like a 15-minute intro call with him this week.

Best,
[Your Name]

| Executive Briefing

THE CATALYST

HMRC's MTD mandate is now live. Phase 2 hits 3.2 million UK sole traders in April 2027 to file quarterly digital taxes (MTD). Legacy software like Xero requires corporate bookkeeping knowledge, causing massive churn.

THE MOAT

A WhatsApp-native tax engine. The AI (fine-tuned on HMRC's BIM37000 rules) categorizes expenses, seals digital links, and files directly to HMRC. Backed by AES-GCM hardware security and CREST-audited.

UNIT ECONOMICS

£12/month (D2C) and **£49 base + £9/seat (B2B Wholesale)**. Meta WhatsApp API costs are <£0.50/mo, delivering **90%+ gross margins**.

THE ASK

£35,000 – £50,000 SEIS-eligible Angel Anchor tranche (3.5% - 5.0% equity) at a £1.0M Valuation Cap. Funds are strictly allocated for UK Visa Endorsement, UK Incorporation, and early Practice Pilot Outreach.
