EXECUTIVE SUMMARY

Self-taught AI Systems Architect and Technology Founder with a formal educational background in Mass Media (Bachelor of Mass Media - BMM). Bridges 4 years of proven growth leadership as Senior Digital Marketing Head at Content Garage with 3+ years as a full-time entrepreneur architecting autonomous Multi-Agent Systems and enterprise AI pipelines. Creator and Founder of **Invisible Accountant**, an autonomous conversational fiscal compliance engine built for the April 2026 HMRC Making Tax Digital (MTD ITSA) mandate for 3.2M UK sole traders. Hands-on systems builder proficient in orchestrating advanced LLM models (Gemini Live API, Claude 3), multi-agent swarms (Antigravity SDK, AgentScope), and secure cloud backends (Python/FastAPI, Supabase PostgreSQL, AES-GCM encryption). Formally submitted for HMRC Production API access (Ref: 2026-OUP153) and completed independent CREST-accredited penetration testing.

FLAGSHIP VENTURE (INNOVATOR FOUNDER FOCUS)

Founder & Systems Architect · Invisible Accountant 2025 – Present
Autonomous WhatsApp-Native Fiscal Compliance Engine for HMRC Making Tax Digital (MTD ITSA)

- De-risked Institutional Traction:** Formally submitted application for **HMRC Production API Credentials (Ref: 2026-OUP153)**; passed independent **CREST-accredited penetration testing**; structured £350,000 dual-tranche pre-seed round (£250k SEIS + £100k EIS) on an 18-month runway to Month 10 operational breakeven.
- Statutory Compliance Architecture:** Architected the end-to-end autonomous ingestion engine that converts unstructured WhatsApp receipt images, voice notes, and chat transactions into legally sealed HMRC digital records under statutory instrument **SI 2021/1076**, eliminating desktop app fatigue for UK micro-enterprises.
 - Dual-Rail Multi-Agent Decision Pipeline:** Designed an intelligent multi-agent orchestration pipeline enforcing HMRC Business Income Manual (BIM) tax rules; implemented automated confidence scoring with an enforced <92% human-in-the-loop review threshold to eliminate AI hallucinations and safeguard taxpayers against Schedule 24 FA 2007 error penalties.
 - Banking-Grade Cryptography & Security:** Engineered zero-leakage multi-tenant data architecture on PostgreSQL (Supabase) incorporating **AES-256-GCM envelope encryption** backed by FIPS 140-3 cryptographic bindings, automated PII masking, and multi-tenant Row Level Security (RLS).
 - HMRC Transaction Monitoring & Anti-Fraud Compliance:** Implemented mandatory `OTHER_VIA_SERVER` HMRC Fraud Prevention Header telemetry (Gov-Client-Connection-Method, public IP hashing, and device telemetry) to ensure full regulatory alignment with HMRC Transaction Monitoring Unit standards.
 - Resilient Multi-Rail Infrastructure:** Deployed high-concurrency asynchronous microservices in Python (FastAPI/AsyncIO) on Render and Supabase with TokenBucket rate limiting (3 req/sec), jittered exponential backoff, and automated failover across WhatsApp Cloud API and Twilio SMS.
 - B2B2C Commercial Distribution Strategy:** Pioneered a scalable wholesale distribution model partnering with UK chartered accountancy practices (£9 wholesale / £12 retail seat pricing), creating a viral ingestion moat that eliminates retail customer acquisition costs (CAC).

ENTREPRENEURIAL CAREER & PROFESSIONAL EXPERIENCE

Founder & Lead AI Engineer · AI Nexlify Agencies Jan 2026 – Present
Enterprise AI Systems, Multi-Agent Swarm Engineering & Conversational Infrastructure

- Autonomous AI Sales Dispatcher ("Layla"):** Architected and deployed "Layla", a 24/7 autonomous web-integrated AI sales dispatcher using Gemini 2.5 Flash LLM, Supabase, and Vercel Edge Runtime, achieving continuous dynamic objection processing and reliable lead capture.
- Autonomous B2B Outbound Engine:** Engineered an Autonomous B2B Outbound Engine utilizing AgentScope (Swarm Architecture) and Python; built bespoke web scrapers and a custom pacing algorithm (5-minute intervals) to automate hyper-personalized communications while securing domain reputation.
- Real-Time Webhook Pipeline:** Orchestrated a real-time intent-scoring pipeline integrating WhatsApp Business API webhooks with Airtable, significantly accelerating speed-to-lead response times and streamlining unstructured data extraction.
- Multi-Agent Frameworks:** Built and managed robust Multi-Agent Systems utilizing the Antigravity SDK and NitroStack infrastructure, accelerating the deployment of full-stack AI automation pipelines.

Founder & Director of Operations · Cashmerean (Luxury B2B)

Sep 2023 – Present

B2B Operations, Supply Chain Logistics & Operational Scale

- **Operations & Supply Chain:** Directed B2B operations and supply chain management for a luxury brand, utilizing data-driven systems to scale operational output and optimize fulfillment pipelines.
- **Workflow Automation:** Integrated digital marketing automation into daily operational workflows, bridging digital strategy with operational efficiency to streamline multi-channel growth.
- **Commercial Execution:** Managed vendor agreements, inventory allocation, and fulfillment coordination across international commercial logistics channels.

Senior Digital Marketing Head · Content Garage

May 2019 – May 2023

Growth Strategy, Customer Acquisition Funnels & Cross-Functional Team Leadership (Last Salaried Role)

- **Team Leadership:** Led cross-functional digital marketing teams, managing targeted growth strategies and campaigns that boosted client acquisition and retention.
- **Data-Driven ROI:** Leveraged data analytics and marketing automation platforms to scale client ROI, driving consistent increases in lead generation across target demographics.
- **Operational Discipline:** Managed campaign budgets, client reporting, and acquisition performance across multi-channel client accounts over a 4-year tenure.

TECHNICAL STACK & ARCHITECTURAL CAPABILITIES

AI & Multi-Agent Systems:	Multi-Agent Systems (MAS), LLM Orchestration, AgentScope (Swarm), Google Antigravity SDK, Gemini Live API, Gemini 2.5 Flash API, Claude 3 (Anthropic), OpenAI API.
FinTech & RegTech Engine:	HMRC MTD ITSA API Specifications, Statutory Digital Links (SI 2021/1076), HMRC Fraud Prevention Headers (OTHER_VIA_SERVER), BIM Tax Rule Categorization, Open Banking API architecture.
Development & Engineering:	Python, JavaScript/TypeScript, Advanced TS/Architecture, FastAPI, AsyncIO, Git/Terminal, RESTful Webhooks, WebSockets.
Infrastructure & Cloud:	NitroStack, Vercel, Supabase (PostgreSQL, RLS), OmniRoute Gateway, Render, Docker, Make.com, Airtable, Wigolo.
Design & Web Ecosystems:	Figma, Webflow, Shopify, UI/UX Design, Stitch MCP.

FORMAL EDUCATION

Bachelor of Mass Media (BMM)

Formal Degree Completed

Formal studies in Mass Communication, Media Strategy, and Consumer Behavior

Note on Technical Mastery: Fully self-taught AI systems architect and hands-on engineer with 6+ years of practical application across multi-agent orchestration, cloud infrastructure, and FinTech compliance.
