

ANAS WAHAB

Founder & Chief Systems Architect · FinTech AI & Autonomous Systems

London, UK / Remote | anas@invisibleaccountant.co.uk | linkedin.com/in/anaswahab97 | github.com/anaswahab231997 | invisibleaccountant.co.uk

EXECUTIVE SUMMARY

FinTech Founder, AI Systems Architect, and Autonomous Multi-Agent Orchestrator with a Bachelor's in Mass Media (BMM) and a proven track record bridging consumer psychology and conversational UI with mission-critical fiscal compliance infrastructure. Creator and Founder of **Invisible Accountant**, an autonomous conversational fiscal compliance engine engineering zero-friction compliance for 3.2 million UK sole traders mandated under HMRC's April 2026 Making Tax Digital (MTD ITSA) legislation. Combines deep technical mastery across advanced LLM orchestration (Google Antigravity SDK, Gemini Live API, Claude 3, AgentScope) with institutional FinTech security (FIPS 140-3 KMS encryption, AES-256-GCM, CREST penetration audited) and 5+ years of operational commercial leadership. Formally submitted for HMRC Developer Hub Production API access (Ref: 2026-OUP153) and architecting a scalable B2B2C wholesale distribution model across UK accountancy practices.

FLAGSHIP VENTURE (INNOVATOR FOUNDER FOCUS)

Founder & Chief Systems Architect · Invisible Accountant London, UK | 2025 – Present
Autonomous WhatsApp-Native Fiscal Compliance Engine for HMRC Making Tax Digital (MTD ITSA)

- De-risked Institutional Traction:** Formally submitted application for **HMRC Production API Credentials (Ref: 2026-OUP153)**; completed independent **CREST-accredited penetration testing**; structured £350,000 dual-tranche syndicate (£250k SEIS + £100k EIS) on an 18-month runway to Month 10 operational breakeven.
- Statutory Compliance Architecture:** Architected the end-to-end autonomous ingestion engine that converts unstructured WhatsApp receipt images, voice notes, and chat transactions into legally sealed HMRC digital records under statutory instrument **SI 2021/1076**, completely eliminating desktop portal friction for UK micro-enterprises.
 - Dual-Rail Multi-Agent Decision Pipeline:** Designed an intelligent multi-agent orchestration pipeline enforcing HMRC Business Income Manual (BIM) tax rules; implemented automated confidence scoring with an enforced <92% human-in-the-loop review threshold to eliminate AI hallucinations and safeguard taxpayers against Schedule 24 FA 2007 error penalties.
 - Banking-Grade Cryptography & Security:** Engineered zero-leakage multi-tenant data architecture on PostgreSQL (Supabase) incorporating **AES-256-GCM envelope encryption** backed by FIPS 140-3 cryptographic bindings, automated PII masking, and multi-tenant Row Level Security (RLS).
 - HMRC Transaction Monitoring & Anti-Fraud Compliance:** Implemented mandatory `OTHER_VIA_SERVER` HMRC Fraud Prevention Header telemetry (Gov-Client-Connection-Method, public IP hashing, and device telemetry) to ensure full regulatory alignment with HMRC Transaction Monitoring Unit standards.
 - Resilient Multi-Rail Infrastructure:** Deployed high-concurrency asynchronous microservices in Python (FastAPI/AsyncIO) on Render and Supabase with TokenBucket rate limiting (3 req/sec), jittered exponential backoff, and seamless automated failover across WhatsApp Cloud API and Twilio SMS.
 - B2B2C Commercial Distribution Strategy:** Pioneered a scalable wholesale distribution model partnering with UK chartered accountancy practices (£5 wholesale / £10 retail seat pricing), creating a viral ingestion moat that eliminates retail customer acquisition costs (CAC).

PROFESSIONAL EXPERIENCE & COMMERCIAL LEADERSHIP

Founder & Lead AI Engineer · AI Nexlify Agencies Jan 2026 – Present
Enterprise AI Systems, Multi-Agent Swarm Engineering & Conversational Infrastructure

- Autonomous AI Sales Dispatcher ("Layla"):** Designed, built, and launched a 24/7 web-integrated autonomous sales dispatcher powered by Gemini 2.5 Flash LLM, Supabase, and Vercel Edge Runtime, managing real-time dynamic objection handling and qualified lead conversion.
- Autonomous B2B Swarm Architecture:** Engineered an autonomous B2B outbound intelligence engine leveraging **AgentScope (Swarm Multi-Agent Architecture)** and Python, integrating bespoke scrapers and proprietary pacing algorithms (5-minute jittered cycles) to safeguard domain reputation.
- Real-Time Webhook Pipeline:** Orchestrated ultra-low latency webhook pipelines integrating WhatsApp Business API with asynchronous datastores, reducing speed-to-lead response latency to under 3 seconds and parsing complex multi-turn intents.
- Production Multi-Agent Frameworks:** Leveraged the **Google Antigravity SDK** and NitroStack infrastructure to rapidly deploy, evaluate, and benchmark high-reliability enterprise agent workflows.

Founder & Director of Operations · Cashmorean (Luxury B2B)

Sep 2023 – Dec 2025

B2B Commercial Operations, Supply Chain Logistics & Operational Scale

- **Commercial & Operational Execution:** Directed international B2B operations, global supply chain fulfillment, and contract negotiations for a luxury commercial brand, implementing data-driven inventory models that increased order fulfillment efficiency by 45%.
- **Automated Business Operations:** Integrated end-to-end ERP workflow automations and digital tracking pipelines, bridging physical logistics with financial forecasting and working capital management.
- **Financial Stewardship:** Managed unit economics, international vendor payments, and inventory risk, maintaining sustained operational profitability and resilient supplier partnerships.

Senior Digital Marketing & Growth Head · Content Garage

May 2019 – May 2023

Growth Strategy, Customer Acquisition Funnels & Cross-Functional Team Leadership

- **Growth & Acquisition Leadership:** Directed high-performing growth teams managing targeted digital acquisition funnels, multi-channel performance marketing, and client retention strategies across competitive B2B and consumer sectors.
- **Data-Driven Growth Infrastructure:** Leveraged advanced cohort analytics and marketing automation platforms to systematically optimize client CAC:LTV ratios, driving a 3.4x average increase in qualified pipeline generation.
- **Cross-Functional Management:** Mentored and led multidisciplinary teams of engineers, designers, and growth analysts, instilling disciplined agile sprint workflows and rigorous performance benchmarks.

TECHNICAL, REGULATORY & ARCHITECTURAL MASTERY

- Autonomous AI & Agents:** Multi-Agent Systems (MAS), AgentScope Swarm Architecture, Google Antigravity SDK, Gemini Live API, Gemini 2.5 Flash, Claude 3 (Anthropic), Function/Tool Calling, LLM Guardrails & Confidence Scoring.
- FinTech & RegTech APIs:** HMRC MTD ITSA API Specifications, Statutory Digital Links (SI 2021/1076), HMRC Fraud Prevention Telemetry (OTHER_VIA_SERVER), BIM Expense Tax Engine, Open Banking (PSD2 / BaaS integration).
- Backend & Cloud Systems:** Python (FastAPI, AsyncIO, Pydantic), TypeScript, PostgreSQL (Supabase RLS, connection pooling), Redis / TokenBucket Rate Limiting, Docker, Vercel Edge Runtime, Render, RESTful Webhooks, WebSockets.
- Security & Cryptography:** FIPS 140-3 Envelope Encryption, AES-256-GCM Cryptographic Binding, CREST-Accredited Penetration Testing Remediation, UK GDPR / Data Privacy, PII Anonymization, OAuth 2.0 PKCE Authorization.
- Commercial & Venture:** B2B2C Software Economics, UK Seed Funding Structuring (SEIS / EIS Dual Tranches under FA 2023), Accountancy Practice Channel Distribution, Product Lifecycle Management (PLM), Agile/Scrum Leadership.

EDUCATION & PROFESSIONAL CREDENTIALS

Bachelor of Mass Media (BMM)

Degree Completed

Core Focus: Digital Communications, Media Strategy, Mass Psychology & Information Architecture

Applied Systems Engineering: Practitioner with 6+ years applied experience across Autonomous Multi-Agent Orchestration (Antigravity SDK, AgentScope, Gemini API), Distributed Backend Infrastructure (FastAPI, PostgreSQL), and Cryptographic FinTech Security (FIPS 140-3, AES-256-GCM) · Member of UK FinTech & RegTech Communities.
